**Model Injection Centres (MICs):
A Program to Improve Injection Practices in the Country**

Process Assessment 2007

Interview Schedule for Member- MIC Committee

State	<input type="text"/>	District	<input type="text"/>
--------------	----------------------	-----------------	----------------------

PMC	<input type="text"/>
------------	----------------------

Namaskar,

My name is _____.

As you are instrumental in implementing the Model Injection Centres (MIC) program in your medical college/hospital, I would like to discuss few issues which will help us to improve the program further. I would appreciate if you could spare few minutes of your valuable time. Your views will be treated as confidential.

Interview

Commencement Time _____ Concluding Time _____

Name of the Respondent:

Designation:

1. Medical Superintendent
2. Nursing Superintendent

1. As you remember, what are the **objectives** of the Model Injection Centres (MIC) program?

2. What do you think about the **relevance** of this program?

3. How many **members** are there in the **Committee** constituted for MIC in your institution?

4. How frequently are the **meetings** being held?

5. How many **meetings** could you **attend** during 2006?

6. What was **transacted** during these meetings?

7. Are there **problems** in **implementing** the decisions of the committee?
If yes, how were they managed?

8. What else should be done to get the **support** from all the **concerned departments** of the College / Hospital?

9. How are the regular **supplies** to the **MIUs** ensured?

10. What is your impression about the MIC program in improving the **safe injection practices** among medical and paramedical **staff** and **students** of the institute?

11. What is your impression about the MIC program in improving the **segregation** of injection related **waste** at the point of generation?

12. What is your impression about the MIC program in improving the **biomedical waste disposal** mechanism in the institute?

13. As you know, large proportions of patients are being treated by the **private practitioners**. How can they be **involved** in this program to train for safe injection practices?

After running the program for two years (2006-2007) we plan to expand it to the neighboring districts / states. If your institute has to coordinate the activities at FOUR other medical colleges / hospitals:

14. What additional **facilities** would be **required** at your institute for such an expansion?

15. Do you foresee any problems in this regard? What is **your advice**?

16. What should be the mechanism to **transfer the ownership** of this program to the **state governments**?

17. What are the **other programs** for injection safety / **infection control** / waste disposal - currently running in the hospital?
